

10 Basic Data

eValue needs the following business data from the last fiscal year or from the last 12 months of operations to give you a first estimate of the value of your company.

eValue relies on the valuation technique Guideline Publicly Traded Company and uses 10 operating data from the last fiscal year or from the last 12 months of operations to compute the value of your business. If the target company is less than 12-month old, indicate the number of months in operation.

1. Name of the Company

The name of the company is the name of the subject company, an abbreviation, or even a fictitious name, and is the name that will appear across the valuation report (example: **Mexican Professional Cleaning Services**)

2. Location

Indicate the name of the city and State where the company is located (example: **Uruapan, Michoacan**)

3. Company Description

Outline your company's basic background information and business concept (example: **Our company specializes in providing cleaning services to upholstery, carpets and furniture**)

4. Starting Operating Year

Year the company started operations (example: **2007**)

5. Revenue

Provide the company's total annual revenues in US dollars (example: **US \$1,323,000**)

6. Operating Income

Provide the company's annual operating income in US dollars; if the company had a loss indicate so by using a minus sign (example: **-US\$123,000**)

7. Depreciation & Amortization

Provide the amount of depreciation & amortization of the company in US dollars (example: **US\$46,000**)

8. Net Income

Provide the company's net income in US dollars; if the company had a loss indicate so by using a minus sign (example: **-US\$28,000**)

9. Total Assets

Indicate the amount of the company's total assets in US dollars (example: **US \$534,000**)

10. Employees

Indicate the current total number of employees of the company (example: **23**)

* * *

If the company has less than a year in operations, indicate the number of operating months. Once you send us the above data we immediately go on to estimate the value of your company and to elaborate the valuation report.
